Power

Grid modernisation: ISGW 2018 highlights emerging sector 6
needs and challenges

Views of Ajay Kumar Bhalla: “We are gearing up our systems to 8
become smart”

Smart grid progress: NSGM and pilot projects pave the way for.... 10
a smooth transition

“There is huge interest in smart grid technologies in India”: 14
Interview with Praveer Sinha

Smart meter roll-out: Expected to pick up pace after a slow start . 16

“New technologies must be brought in”: Views of AEGCL's..... 18
S.N. Kalita

Upgrading the grid: Private discoms’ IT measures in Maharashtra ... 20

“Grid modernisation is an inevitability”: Views of APDCL's 24
Puru Gupta

Overhauling transmission: Mahatransco undertakes 26
modernisation of its grid network

Digitising processes: MSEDCL undertakes grid modernisation 27
for smooth operations

**“Digitisation is the biggest opportunity for the power 29
ecosystem”:** Interview with Pitamber Shivnani, President, Power Grids
Division, ABB India Limited

Digital future: IoT and big data to transform the power sector 30
technology landscape

Intelligent operations: Initiatives to make the transmission grid 32
more dynamic

Leveraging EVs: Vehicle-to-grid concept could improve load 33
management

India’s energy outlook: BP’s projections till 2040..... 35

Water

Smart solutions: Nagpur takes steps to ensure 24x7 water supply ... 37

Plugging leakages: Utilities focus on reducing non-..... 38
revenue water

Metering advances: Best practices and solutions 42
for effective water management

Plant rehabilitation: DJB implements integrated water 44
management system

Digital governance: IMC’s tech initiatives for improved service 46
delivery

Recycle and reuse: Technology solutions for efficient utilisation 48
of wastewater

Improved services: DWASA’s strategies to reduce water losses 50
in Dhaka

Key statistics: Application-based solutions for better governance .. 52
under the Smart Cities Mission

Gas

Technology interventions: CGD operators adopt advanced 54
solutions to expedite infrastructure roll-out

Metering matters: CGD entities focus on improving billing and 56
collection

Increasing automation: IGL adopts new technologies in its 58
business operations

Network integrity: Ensuring uninterrupted supply of natural gas..... 60
to consumers

Efficient operations: CGD companies deploy SAP for key.....62
business processes

Safety first: Focus on pipeline integrity management and O&M..... 63

Key statistics: Status of CNG stations, PNG connections and 65
natural gas pipeline network
