## Conference highlights

### Impact of NTP 2011

The draft National Telecom Policy 2011, released by DoT in October 2011, seeks to bring in greater clarity on key issues in the sector. It recommends implementing a unified licence regime, halving the mobile licence tenure, achieving 100 per cent rural teledensity by 2020 and eliminating roaming charges. To analyse the implications of the policy on the industry, *tele.net* recently organised a conference, “Impact of National Telecom Policy”. The conference comprised four sessions: Spectrum Pricing and Allocation; One Nation, One Licence; Mergers, Acquisitions and Consolidation; and Broadband Services and Infrastructure. The highlights of the conference sessions...

### The sky's the limit

Page 10

The telecom industry is upbeat about the potential of cloud computing. The cloud platform will not only bring in new revenue streams for operators but also lead to cost savings. Global majors like AT&T and Verizon as well as incumbent Indian operators are investing significantly in the cloud space to capitalise on this opportunity...

### Telefocus: OSS/BSS

Page 44

The launch of next-generation technologies, an increased focus on customer retention, and the need to bring down operational costs have triggered a demand for OSS/BSS solutions. With operators migrating from legacy to next-generation networks, the OSS/BSS segment is witnessing a spurt in growth. A look at the key trends, challenges and opportunities in this space...
